For Immediate Release

ONLINE CONTINUING EDUCATION

Waukesha, WI, August 2, 2007—Metal-Era Inc., the national leader of perimeter edge roofing systems, is proud to announce that it will be once again be offering its monthly online continuing education program, *Understanding ANSI/SPRI ES-1*. Metal-Era’s continuing partnership with the American Institute of Architects (AIA) and Roof Consultants Institute (RCI) allows design professionals to receive continuing education credit for this course.

“Due to the phenomenal success of our previous online continuing education program,” says Chief Operating Officer, Tony Mallinger, “it was an easy decision to continue the program.”

Understanding ANSI/SPRI ES-1 covers wind uplift issues related to the roof edge, particularly the ANSI/SPRI ES-1 industry standard which has been adopted by the International Building Code (IBC). This is a particularly relevant issue as more and more states are adopting the International Building Code and recognizing the critical role that the roof edge plays in the overall integrity of the building.

“Our webinars are a wonderful extension of our face-to-face presentations and allow for easier access to this program to those who may not otherwise have the opportunity to attend,” says Chief Operating Officer, Tony Mallinger.

Metal-Era will be offering free webinars on the second Thursday of each month. Attendees are eligible for (1) AIA CEU, (1) AIA HSW and (1) RCI CEH. To sign-up for a webinar, visit www.metalera.com, or to request a lunch 'n learn in a particular area, call 800-558-2162
