METAL-ERA RELEASES NEW PRODUCT LITERATURE

Waukesha, WI—Metal-Era, Inc., the national leader in commercial roof edge and roof ventilation solutions, announces the release of their updated Edge Systems One brochure. The brochure has been completely redesigned and highlights the product line's ease of installation.

Edge Systems One was developed with the contractor in mind. The line offers unbeatable lead times for 15 popular express colors, with next day shipping on most orders. The non-penetrating design eliminates the need to strip-in or crimp, making installation quick and easy. Edge Systems One products are ANSI/SPRI ES-1 tested as required by the International Building Code and are competitively priced, making this roof edge line an ideal solution for any project.

"I'm pleased with our new brochure. It is a great representation of Metal-Era and the Edge Systems One product line," says Chief Operating Officer, Tony Mallinger.

The new brochure is available immediately on Metal-Era's website, www.metalera.com, or can be requested by calling 800-558-2162.
