NEW EXPANSION JOINTS OFFER 4-WAY MOVEMENT

Waukesha, WI—Metal-Era, Inc., the national leader in commercial roof edge and roof ventilation solutions, introduces the release of its newest product, the Perma-Tite Expansion Joint.

The Perma-Tite Expansion Joint is available in two versions: the Roof to Roof Version and the Roof to Wall Version. The provided special articulatory cleat allows four-way movement for the expansion and contraction between either two roof systems or a roof and wall system. Perma-Tite Expansion Joints also prevent condensation by insulating against internal building temperatures.

“The expansion joints are a great system that we’re able to offer the industry,” says Chief Operating Officer, Tony Mallinger. “Our customers frequently approach us regarding new ways to manage unique roof conditions and the Perma-Tite Expansion Joint is an excellent example of how we’ve been able to address those real-world concerns and provide innovative solutions.”

Perma-Tite Expansion Joints are available immediately for more information visit Metal-Era’s website, www.metalera.com, or by call 800-558-2162.
